

2 – Extension Activity for *I Need It! I Want It!*

Specific Outcome(s)

At the end of this extension activity, students will be able to identify the names and values of Canadian coins.

Materials Provided

- Money Memory Cards (one set for each pair of players)

Materials Needed

- Cardstock
- Elastic bands
- Scissors

Logistics

- Print the Money Memory Cards on cardstock 😊
 - Print enough copies for each pair of students.
- Prepare the activity for students.
 - Cut out Money Memory Cards.
 - Secure the Money Memory Cards with an elastic band.

Procedure

- This game requires observation, concentration, and a good memory to win. The objective of the game is to collect the most sets of matching cards.
 - Players take turns flipping cards face up.
 - If the cards are a matching pair, players get to keep these cards.
 - If the cards do not match, they must be flipped face down.
 - The game ends when there are no cards left, and the player with the highest number of matching pairs is the winner.
- Divide players into pairs. Give each pair of players a set of Money Memory Cards and ask them to shuffle the cards.
- Have players lay out the cards in rows and columns face down. Players should have four rows of cards with each row containing five cards.
 - Make sure players place the cards far apart enough that they are not touching each other and can be flipped over without disturbing any of the cards around them.
- Assign one player to go first.

- One player chooses a card and carefully turns it over. The same player then selects another card and turns it over.
 - If the two cards are the same (e.g., two toonies are flipped face up) the player keeps these cards.
 - If the cards do not match, they are turned back over (face down).
- The other player chooses their first card and turns it over.
 - If it is a match to one of the cards the previous player turned over, then they try to remember where that matching card was and turn it.
 - If they are not able to match their first card with a card the other player turned over, they must select another card in hopes of making a match.
 - If there is a successful match, the player keeps these cards.
 - If the cards do not match, they are turned back over.
- The game continues in this fashion until no cards are left.
- Once all the cards have been played, the player with the most matching pairs is the winner.
