

Canadian Coins Poem

The Nickel

A sitting beaver is on the back
The coin is silver. That's a fact.
The Queen is on the other side.
A nickel is worth five cents. Say it with pride.

The Dime

A dime is the smallest coin of them all,
With the Bluenose sailing strong and tall.
A dime is worth ten cents, this is true.
Say it again. Let's review!

The Quarter

A caribou will be found
On a quarter, nice and round.
A quarter is worth twenty-five cents, it's clear to see.
That makes me happy as can be!

The Loonie

A pretty loon can be seen
On a loonie, gold and clean.
A loonie is round and shiny
It is worth one dollar and is not very tiny.

The Toonie

A toonie is silver and gold.
It has a bear that stands bold.
A toonie is worth two dollars, that's a lot.
It's the largest coin we've got.
